World Class Socketing Solutions

PRECISELY **PERFECT**

Founded in 1999, Masters Preci Tools is a trusted source for Socketing Solutions in the PVC Industry. As manufacturers, suppliers, and exporters, MPT's customer base extends beyond the shores with a notable presence in the African and Gulf Countries. For PVC Pipe companies who value precision, durability, and flawless functioning, MPT is a name of first recall.

POISED FOR **GROWTH**

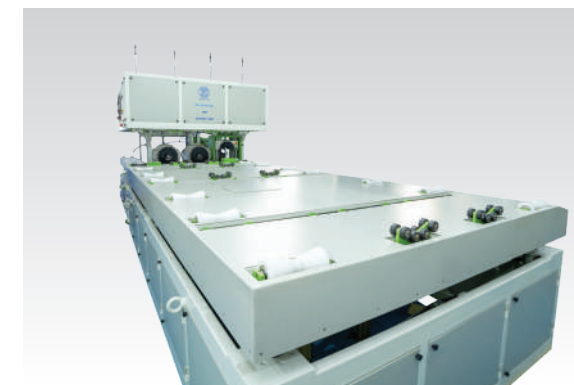

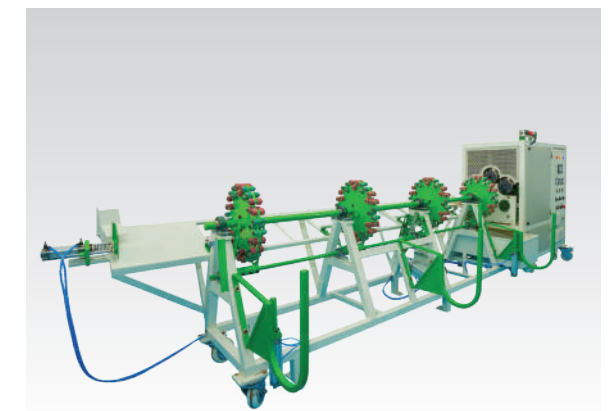

The PVC Pipes Industry has been growing at a phenomenal rate, replacing the conventional Pipes market. Being superior in terms of longevity, resistance to weather and exposure, and above all being light-weight and easy to install, PVC Pipes are highly preferred across sectors. This in turn has generated a demand for Socketing Solutions, ensuring MPT's growth in the long-run. Renowned PVC Pipe brands trust MPT for its high quality machinery which prove to be highly cost-effective with minimum maintenance and advanced operations.

PRODUCT **PORTFOLIO**

MPT's product portfolio includes both Offline and Online Socketing Machines. MPT also provides customized machinery to meet the diverse needs of the industry. MPT Socketing Machines, Special Purpose Machines, and Press Tools are known for their perfect engineering and strong back-end service. What's more, MPT has complete control on the warehousing and packaging fronts, ensuring safe transit and delivery.

FLAGSHIP **PRODUCTS:**

- Linear Belling Machine
- Rotary Belling Machine
- Short Coupler Machine
- RRJ Coupler Machine
- Bending Machine
- Dual Side SWR Machine

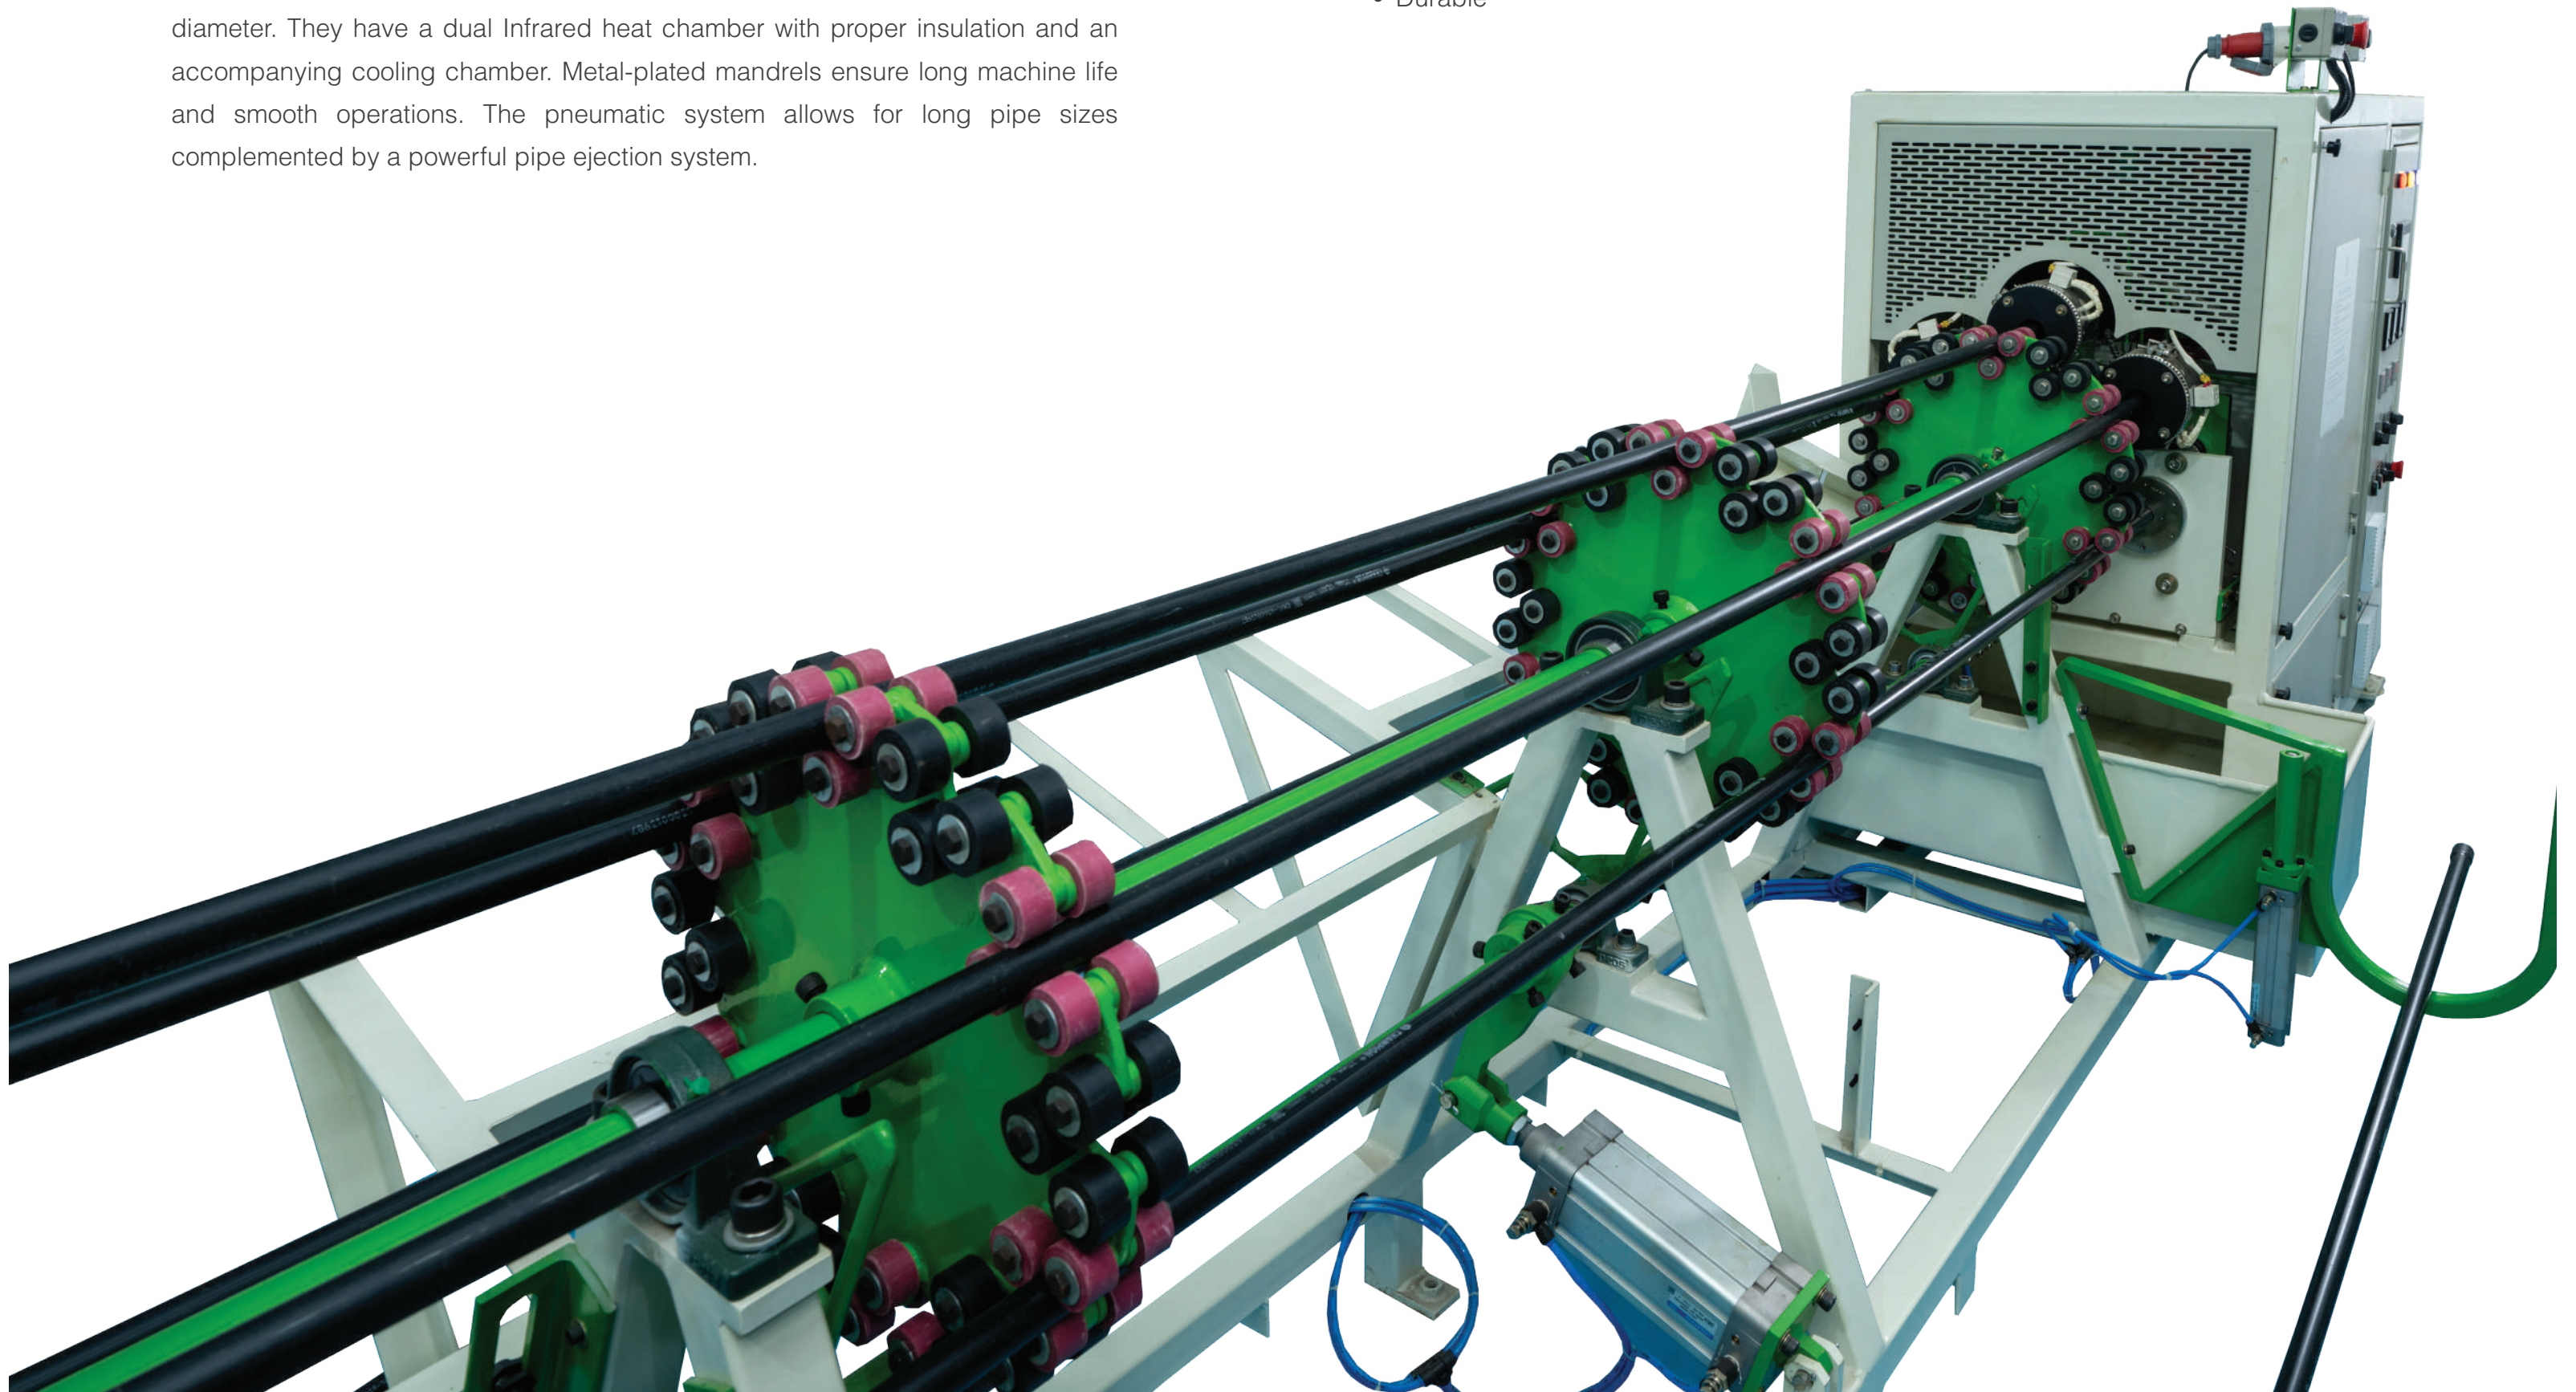

A REAL REVOLUTION IN ROTARY **SOCKETING TECHNOLOGY**

MPT is a leading manufacturer of Rotary Socketing Machines which meet the exact requirements of customers, not to mention that they are 'highly customized'. These machines are fitted with easy-to-change tool systems according to the Pipe diameter. They have a dual Infrared heat chamber with proper insulation and an accompanying cooling chamber. Metal-plated mandrels ensure long machine life and smooth operations. The pneumatic system allows for long pipe sizes complemented by a powerful pipe ejection system.

KEY **HIGHLIGHTS:**

- International quality standards
- Cost Effective
- High Output
- Low Maintenance
- Durable

DIGITAL OPERATIONS FOR OPTIMAL OUTPUT

MPT Rotary Socketing Machines come with a digital display and alarm system. The automatic shutdown feature increases machine life while minimizing wastage. From the most renowned PVC Pipes manufacturers to regional players, all trust MPT machinery for long-term cost savings and optimal functionality.

The MPT **ADVANTAGE:**

Seamless Pipe Rotation

The advanced rotor mechanism ensures uniform rotation of the pipe

Dynamic Speed Control

Rotary technology ensures adjustable speeds for precise movement, reducing errors and improving product quality.

Consistent Alignment

Rotary systems maintain precise pipe alignment throughout heating and shaping for consistent results.

Advanced Heating Technology

Our machines use Short Wave Infrared (IR/SW) chambers for rapid, precise heating, ensuring uniform temperatures, reduced cycles, energy efficiency, and high-quality socketing.

Reduced Friction and Wear

The technology uses optimized bearings to reduce friction, minimizing wear and extending the machine's lifespan.

S.No	From Range (mm)	To Range (mm)	Pipe Length	Mechanism	Entry	Heating	Socketing	Maximum Pipes/hour	Connecting Load	Output	Machine Class
1	19	32	3 metres	Pneumatic	1	3	1	450	3.7 kw	High Capacity (250+ pipes/hr)	Small Range
2	19	50	3 metres	Pneumatic	1	3	1	450	3.7 kw	High Capacity (250+ pipes/hr)	Small Range
3	20	50	6 metres	Pneumatic	1	3	1	450	3.7 kw	High Capacity (250+ pipes/hr)	Small Range
4	20	63	3 metres, 6 metres	Pneumatic	1	3	1	450	3.7 kw	High Capacity (250+ pipes/hr)	Small Range

OUR SERVICES

Advanced Remote Diagnostics

Quick identification and solving of issues without on-site visits, ensuring minimal downtime.

Real-Time Remote Support

Troubleshoot and resolve issues using cutting-edge diagnostic tools, saving time and money.

Seamless Installation & Commissioning

Rapid setup to get your machinery started without delays.

Training Programs

Equipping your team to operate and maintain machinery effectively.

Preventive Maintenance

Scheduled check-ups to maintain peak performance and prevent breakdowns.

On-Site Repairs & Spare Parts Supply

Reliable access to parts and technicians for repairs when needed.

KEY CUSTOMER LIST:

MPT is trusted by 150+ esteemed clients across industries. Delivering excellence and precision all along the way!
